

Adaptation Encyclopedia

We can create a more sustainable future by taking steps to build **knowledge** and track change. A future where we utilise the power of technology to **adapt** to a new reality.

We can solve environmental and climate issues by managing **living beings** and natural resources, from bees to flowers and trees. We will make these solutions a reality by investing in **nature-based** initiatives.

Here are some projects that will interest you based on your answers. Click on each to explore them.
