

## Systems Atlas

We can create a more sustainable future by taking steps to build **knowledge** and track change. A future where we **prevent** severe climate and ecological breakdown by working with the earth rather than against her.

We can solve environmental and climate issues by managing the **elements** that regulate life, from soil to the sun. We will make these solutions a reality by investing in **human systems**, such as infrastructure, transport and digital enhancements.

Here are some projects that will interest you based on your answers.

### LandGriffon

Empowering companies to measure, manage, and sustainably transform agricultural supply chain impacts.

[Learn more](#)

### Global Forest Watch

Offering the latest data, technology and tools that empower people everywhere to better protect forests.

[Learn more](#)

### ReFED

Advancing data-driven solutions to fight food waste. ReFED is working across the food system to cut food loss and waste in half by the year 2030.
