Adaptation Encyclopedia

We can create a more sustainable future by taking steps to build **knowledge** and track change. A future where we utilise the power of technology to **adapt** to a new reality.

We can solve environmental and climate issues by managing **living beings** and natural resources, from bees to flowers and trees. We will make these solutions a reality by investing in **nature-based** initiatives.

Here are some projects that will interest you based on your answers.

Global Forest Watch

Offering the latest data, technology and tools that empower people everywhere to better protect forests.

Learn more

Ocean Watch

Providing trusted data for sustainable ocean management and development.

Learn more

Half-Earth

Reimaging the way we care for our planet to inspire informed collective action to save the biosphere.
