# vizzuality.

Shared Communities

We can create a more sustainable future by taking steps to build **knowledge** and track change. A future where we **prevent** severe climate and ecological breakdown by working with the earth rather than against her.

We can solve environmental and climate issues by managing **living beings** and natural resources, from bees to flowers and trees. We will make these solutions a reality by investing in **human systems**, such as infrastructure, transport and digital enhancements.

Here are some projects that will interest you based on your answers.

Global Forest Watch

Offering the latest data, technology and tools that empower people everywhere to better protect forests.
